Extracurricular Activities

University of Delaware Entrepreneurship Program | 09/2024 – 06/2025

- Developed skills to turn a problem into a business idea
- Learned to make and maintain professional connections
- Became comfortable with being uncomfortable to get things done
- Developed skills to give a sales pitch
- Acquired the relevant knowledge for small business management
- Learned to make more money with what you have

Long Island University Intro to Artificial Intelligence | 09/2024 – 01/2025

- The course covered the basic principles of Artificial Intelligence. Learning some basic AI techniques, the problems for which they are applicable, and their limitations. The course content was organized roughly around what are often considered to be three central pillars of AI: Search, Logic, and Learning. Topics covered include basic search, heuristic search, game search, constraint satisfaction, knowledge representation, logic and inference, probabilistic modeling, and machine learning algorithms.

Madison Institute of Technology Club | 11/2021 – 03/2022

- Learned the basics of Python programming
- Learned the interworking of websites
- Learned the basics of HTML
- Learned the basics of CSS
